PROGRAM INFORMATION

YVC's Spanish Medical Interpreter program is a 10 credit short-term certificate, preparing students to work as an interpreter in a health care setting. Designed for the bilingual student, this program provides an understanding of the role of medical interpreter, teaches how to respond to a variety of interpreting situations, and gives students concrete skills to provide effective interpretation and cultural advocacy. Also included is instruction in the special linguistic skill required to build effective patient-interpreter-clinician relationships while reinforcing the patient-clinician bond.
