

**Stormwater Pollution Prevention Plan SWPPP –****10.02.2023**

1. Check all Drywells & Catch basins on campus annually, make repairs and remove sediment and debris as needed.
2. Re-Paint required Stormwater signage annually as needed to keep it clean and legible.
3. Continue to provide campus and departmental safety training, with an emphasis on discharge prevention and discharge protocols. As well as the importance of protecting water quality and minimizing the impact on the local Stormwater system.
4. Use best practices for activities pertaining to the protection of Stormwater.
  - Limit all vehicle washing to specified areas.
  - Use proper application techniques for Fertilizer & Pesticide applications.
  - Limit the use of chemical cleaning additives for exterior washing of buildings.
5. Proper signage and easy access to spill kits.
6. All Maintenance Staff will be provided annual training in the best practices of maintenance of the stormwater system as well as the prevention of spills and or illicit discharges into the system. We will also coordinate with the City of Yakima for any additional trainings that may be warranted.
