Stormwater (IDDE) Spill response Plan

03.02.2024

1. As soon as a spill is detected, immediately contact the Director of Facilities and access the closest Stormwater spill kit and stop the spread of the spill. Using the spill kit and any other means available to keep the spilled material from reaching the water table, remove all of the spill material, make repairs and remove sediment and debris as needed.
2. The Director shall contact the City of Yakima as they are the primary permittee as well as the Dept. of Ecology and report the spill.
3. Continue to provide visual local over watch of the spill location and apply prevention and discharge protocols.
